

TECHNICAL INFORMATION

What about ice generators ?

The Geneglance sas policy aims to improve its technology and the reliability of its equipment for the satisfaction of the world users. We are bringing improvements to our flake ice generator with focus made on performance & efficiency, hygiene and durability while preserving competitive prices.

New shaft bearing arrangement on our F15 machines

The Main shaft bearings for the F15 has been changed. The traditional steel flange is replaced by a composite ring insert in a stainless steel bearing. Both upper and lower bearings are concerned. The new arrangement is bringing for the customer important added values and give our machine a strong competitive advantage on the market :

No greasing required

Life time centering

No corrosion

For maintenance, there are some modifications for parts which are listed hereunder. Be informed also that, this new bearings can be fitted on old machines, in that case the main shaft has to be replaced.
